Full Stack Developer with experience building web applications using **React, Next.js, and Node.js**. Interested in developing scalable digital products, integrating external APIs, and creating technological solutions to real-world problems. Experience in both frontend and backend development, database management, and web application deployment.

FEATURED PROJECTS

---

1. **Kesasoft — Poultry Management SaaS (2025 – Present)**

Web-based system for managing poultry businesses, including sales, inventory, customers, and cash operations.

- Full stack development using **Next.js and NestJS**.
- Implementation of **cash management modules** (opening, closing, and reporting) and sales dashboards.
- Customer management with **credit tracking and custom product pricing**.
- System for **orders, payments, and inventory control**.
- **User and collaborator management with role-based access**.

Technologies: Next.js, NestJS, PostgreSQL, TailwindCSS, JWT, Docker

2. **Bloody Room — Cloudinary & MiduDev Hackathon (2024)**

Web application that allows users to change image backgrounds using artificial intelligence.

- Built with **Next.js and TailwindCSS**.
- Integration with **Cloudinary AI transformations** for image manipulation.
- Use of **OpenAI Whisper API**.
- Authentication with **Firebase and Google OAuth**.
- Image storage using **Cloudinary**.

3. **Mikhuy — University Cafeteria Ordering System (2025)**

University project aimed at simplifying food ordering in campus cafeterias.

- Development of the landing page using **Astro and React**.
- Responsive design with **TailwindCSS**.
- **Collaborative team project**.

4. **Savings Plan Calculator – UNMSM (2024)**

Web application that generates personalized savings plans for university students.

- Full stack development using **Next.js**.
- Integration with **Gemini API** for automated financial recommendations.
- Animations implemented with **Framer Motion**.
- Deployment using **Vercel**.

EDUCATION

Universidad Tecnológica del Perú (2021 – 2025)

Bachelor's Degree in **Systems Engineering and Informatics.**

SKILLS

Programming Languages: Javascript, Typescript, Python, Java.

Frontend: React, Next.js, Astro, TailwindCSS, HTML5 / CSS3.

Backend: Node.js, Express, NestJS, REST APIs.

Databases: PostgreSQL, MySQL, MongoDB, Firestore.

Tools: Git, Docker, Firebase, Postman, Figma, Photoshop

LANGUAGES

Spanish: Native

English: Intermediate (technical reading and documentation)
